DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to method and apparatus for processing fluid.

Group II, claim(s) 18-22, drawn to method of determining fluid flow.

Group III, claim(s) 23-28, drawn to Biasing means.

Group IV, claim(s) 29-33, drawn to trigger means.

Group V, claim(s) 34, drawn to method described with reference to at least one of the accompanying drawings.

Group VI, claim(s) 35, drawn to apparatus described with reference to at least one of the accompanying drawings.

The inventions listed as Groups I –VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not require the determination of the fluid flow as claimed in group II nor the biasing means or triggers or the method and apparatus in the drawings.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
